

ALFALFA

Ag1000®

Ag1000® is a ready-to-use soil conditioner, comprised of Effective Microorganisms®. Ag1000® allows a better nutrient exchange in your soil and helps to improve drainage, aeration, moisture retention and soil structure and decrease fertilizer requirements while maintaining or improving yield. Healthy soil leads to healthy plants – Ag1000® provides your plant with essential vitamins, amino acids and enzymes that improve plant vigor and enhance plant growth.

Overall, Ag1000® will increase your bottom line by increasing yields and production. Continued use of Ag1000® will improve nutrient availability, assist in balancing pH and increase organic matter for improved moisture retention.

TeraGanix® will provide training on the use of Ag1000® and serve as a technical resource throughout the use of the product. We are proud to provide industry leading solutions for a multitude of needs and will serve as a partner in your business to assist in your growth by using our product knowledge and business philosophy.
